Half of Deltona Clean of Storm Debris; City Plans Second Debris Sweep

October 25, 2016—Approximately half of the storm debris from Hurricane Matthew has been collected and the City expects to have the 1st round of debris pick-up finished by the end of October. Once this first sweep of large storm debris and construction debris is completed, the City will begin the second round of storm debris pick-up to clean up any missed or new accumulations of storm debris. This will likely be the final sweep for storm debris in Deltona, as determined by the scope of damage in the City, and should take five to seven days. To assist with the storm debris pick-up, the City contract hauler has brought in additional equipment for both rounds of debris collection.

The City recommends that residents have storm debris in piles on the right of way/curbside by the end of this weekend in case the second sweep occurs in your area next week. After the first sweep, the City plans to release a pick-up schedule (methodology) based on the grid map, for purposes of the second sweep. Additionally, the City is coordinating with Volusia County, for debris pick-up on the County roads in Deltona.

Storm debris must be separated from normal household and bagged trash. The contract hauler will not collect any storm debris that is bagged or in any type of receptacle. Leave the storm debris (tree limbs, trunks, large branches) in a pile by itself separate from construction debris (lumber, plywood) that needs to be in different pile. The regular waste hauler, Waste Pro, will collect household trash and bagged yard debris—leaves and small branches. Do not mix household trash and bagged debris with storm debris. For more information, call (386) 878-8100.
